

# Biscornu Pin Cushion

## Instructions

Thanks Cyndy for the pictures and Instructions

Embroidery the design front and back.

I like to use Aida Cloth

but I have seen some beauties done on Cotton,

what ever you like

Just stablize well

Trim edges Leaving about a 1/2 inch seam allowance

2. trim all sides and mark the middle of each side  
using a marking pen.

You cannot see these in the pictures  
but I clipped the marking lines to make it easier to sew.

3. pin the corners to the middle point of a side

4. pin on side flip it over and pin the other side.

5. The project should look like this once all corners are pinned to the middle points of the sides.

6. The outside embroidery line is a way to sew together the traditional way by hand  
Stitch by Stitch. This done with wrong sides together  
but a faster way is below and shown in the picture

6. sew around the edges on the sewing line.

Leave one edge open for turning and stuffing the pin cushion.

You may find it easier to sew one side at a time.

7. Turn right side out.  
Shape the pin cushion, stuff and hand sew shut.

8. Top side

9. Bottom side
